SUREKHA SHINDE

Software Developer | Java & SpringBoot | Microservices | Rest APIs | AWS | React & JavaScript | CZ Work Authorized

+420 739523110 | shindesurekha1101@gmail.com | Linkedin.com/surekha-shinde
https://github.com/surekhas1 | Brno, Czech Republic

SUMMARY

Software Developer with strong experience in designing and developing scalable applications using Java and Spring Boot. Experienced with frontend technologies like HTML, CSS, and Angular for supporting UI components, along with knowledge of database systems and containerization (Docker).
Skilled in building RESTful APIs, integrating with cloud platforms (AWS), and implementing CI/CD pipelines.Adept at collaborating in agile methodologies and cross-team collaboration, leading to timely project deliveries and quality code improvements. Committed to applying backend development expertise to enhance platform scalability and support business growth objectives.
Legally authorized to work in the Czech Republic (long-term residence permit under family reunification, no work permit required)

EXPERIENCE

Java Software Engineer

KPIT

11/2020 - 12/2025 Pune, India

- Worked as a **Software Developer** contributed to the development of scalable enterprise applications using **Java**, **Spring Boot**, and **Microservices architecture**, and frontend technologies such as **React**, **JavaScript**, **HTML**, and **CSS**, including an end to-end Engineering Diagnostics Platform that supports **predictive maintenance** and **real-time fault analysis** in automotive systems.
- Developed and exposed **RESTful APIs** using **Java** and **Spring Boot** to enable seamless integration with external automotive systems and diagnostic tools, facilitating **Real-time Data Exchange**, **System Integration**, **interoperability**, and efficient communication between **Distributed Systems** components within the diagnostics platform.
- Contributed to **frontend** development using **React**, **JavaScript**, **HTML**, and **CSS**, building responsive and user-friendly interfaces that integrate with backend services, enhancing workflow efficiency and enabling engineers to access and visualize diagnostic insights seamlessly.
- Utilized **Maven** for efficient build and dependency management and **Git** for version control, implementing branching strategies, code merges, and pull request workflows to support team collaboration.
- Enhanced application reliability by writing **unit tests** using **JUnit** and mocking external dependencies with **Mockito**, resulting in higher **test coverage** and faster debugging cycles.
- Supported deployment and maintenance of **microservices-based** applications on **AWS cloud infrastructure**, utilizing services such as **EC2, S3** along with **Docker** and **Kubernetes** concepts to enable scalable, reliable, and efficient application environments.

TECHNICAL SKILLS

Languages & Frameworks

Core Java, Java, Spring Framework, Spring Boot, RESTful APIs, Microservices Architecture, React, JavaScript, HTML, CSS.,

Databases

MongoDB, MySQL

GenAI & Spring AI

LLM fundamentals, Spring AI integration, RAG concepts, prompt engineering, Ollama (local LLMs), MCP basics

Cloud & DevOps

Git, Maven, Jenkins, Docker, Kubernetes, AWS, SonarQube, Mend

Testing framework & tools

JUnit, Mockito

KEY ACHIEVEMENTS

Keep Commitments Award

Recognized for consistently honoring commitments, demonstrating responsibility, reliability, and strong ownership within the team.

Enhanced Code Efficiency

Enabled a culture of continuous improvement that decreased development errors by 30% through exhaustive team collaboration and code reviews.

Successful Project Completion

Successfully led the launch of critical features ahead of tight deadlines, achieving a more efficient projects.

TRAINING & COURSES

Java In-Depth: Become a Complete Java Engineer!

Learned Core Java, OOP concepts, JDBC, Collections, Multithreading, and Spring Boot fundamentals.

Complete Java Certification – Udemy

Gained knowledge of Core Java, object-oriented programming, collections framework, exception handling, file I/O, and basic multithreading concepts.

Master Java Web Services & REST API with SpringBoot

Learned to build RESTful web services using Spring Boot, Spring MVC, and JPA.

LANGUAGES

English
Native

EDUCATION

Diploma in Information Technology

Maharashtra State Board of Technical Education, Mumbai

06/2014 - 06/2017 Nashik, India

Bachelor of Engineering in Information Technology

Savitribai Phule Pune University

07/2017 - 11/2020 Nashik, India
